Meeting date: January 26
Meeting place: M2
Meeting subject: Soil Fertility section meeting

1. **Native place presentation –** Zhi Liang
2. **Newcomers to JORNÆR**
   Christian Dold – Tenure Track Assistant Professor
   René Valentin Klausen – research assistant employed by Søren O..
   Elsa Lagerqvist – guest PhD with Iris Vogeler
   Jianbo Chen – guest scientist with Søren O.
   Franca Giannini-Kurina – Postdoc with Jørgen E.
   Muhammad Qaswar – Postdoc with Peter and Jørgen E.
   Emma Damgaard Lempert – completed her education as lab technician
   Kathrine Øster Høstgaard – transfers to Foulumgaard as of February 1st
   Yusra will revisit Peter for 2-3 months this spring.
3. **MUS/GRUS**
   All lab technicians have been invited for staff development dialogues (MUS) and the rest of the section will follow shortly. Remember to always keep your Outlook calendar updated with meetings, holidays, out of office, etc.
4. **News from the committees**
   LSU: No news
   PhD committee: No meetings have been held just yet.
   Data management committee: See item no. 5.
   AGRO Department Forum: Meeting was held January 19th and the minutes will be available online next week addressing our new Foulum campus, new degree programs, AGRO self-evaluation, recruitment plans, etc.
   LAB: we will exercise a thorough clean- and tidying up next week, so please label your stuff in the labs if you want to avoid it from being thrown out.
   Sustainability committee: this is a new, cross-Foulum committee. Each section proposes at least one person, and Tanja and Leanne have volunteered. Next step: the heads of departments will select the committee to get a broad representation of employees.
5. **Data management**
   All papers published in 2021 will be assessed to appoint a person responsible for meeting the rules on how and where to save our publications. See https://agro.medarbejdere.au.dk/en/project-management/data-management for directions. We need to always be able to retrieve our publications. This is a mandatory task. The PURE overview will be sent to all scientists.

When all publications have been properly transferred, we will celebrate with cake from Jørgen.

6. **Section ½ day**
   As of February 1st, we will all be back in Foulum full time, so let's organise a teambuilding event – the following suggestions were put forward:
   Tour de LABS – for instance with focus on new equipment such as GC, TOC, sample oxidizer and ion chromatograph. Jørgen will further discuss this with the lab technicians.
   Jørgen welcomes additional suggestions.

7. **AOB**
   Staffing plans: Alice will schedule individual meetings with all project leaders before the end of February so we have a complete overview by March 1.
   Lars: A master student will do some work here in Foulum.
   New calls: This needs to be addressed by the scientists, perhaps in continuation of our next section meeting.
