

# COLLABORATION IN THE DEPARTMENT

Professor Jørgen E. Olesen

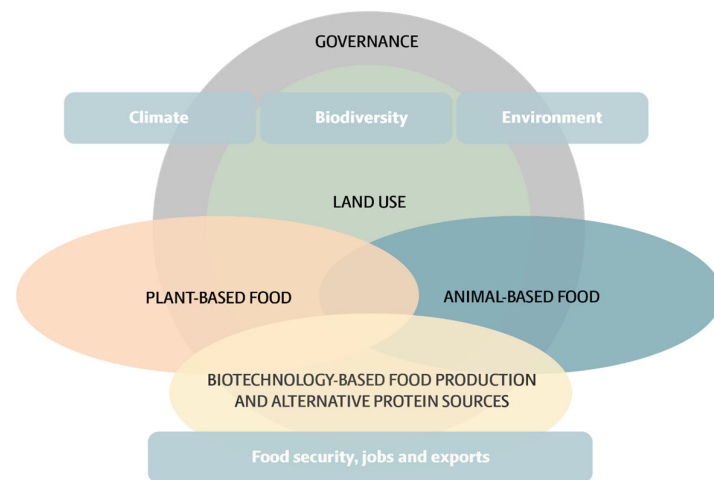

## Department of Agroecology - organisation

# Agricultural green transition

- Reducing environmental and climate impacts of food and agriculture
- Reversing the decline in pollinators and loss of biodiversity
- Setting aside land for multiple functions
- Increasing food supply in support of demands
- Contributing to sustainable jobs and welfare

## AgriFoodTure roadmap

Roadmap developed by AU, UCPH, DTU, SEGES

Application submitted October 2021

# Research collaboration

- Integration of Land-CRAFT
- Defining and developing new major research programs (cross-sections)
  - Green transitions
  - Digital farming
  - Biodiverse cropping systems

# Degree programmes

---

- Student recruitment – also via sections and centres
- Revising programs (better include green transition)
- Developing new ERASMUS MUNDUS (Agroecology)
- Doing part of the study at the centers
