

Aarhus-Novo Nordisk Science and Talent Network 2019 SYMPOSIUM

15 March 2019, Aarhus University

SAVE THE DATE

You are hereby cordially invited to the

**3rd joint AU-NOVO NORDISK SYMPOSIUM
on Friday 15 March 2019, 08:45-15:00 at Aarhus University.**

Join in and seize the unique opportunity to mingle and exchange ideas with researchers from AU and Novo Nordisk here in Aarhus!

The meeting is the annual highlight of the ongoing joint industrial PhD programme as part of the strategic alliance between Novo Nordisk and Aarhus University, and will feature presentations about Novo Nordisk's corporate vision, research foci, scientific projects, and potential career opportunities. A poster session will provide a platform for Novo Nordisk and AU scientists to establish new contacts and develop joint ideas. Last, but not least, the meeting will allow for networking and mutual inspiration.

Registration is open now on <https://events.au.dk/au-novonordisksymposium2019>

We will soon publish the detailed program and a call for posters.

The meeting is part of a series of annual symposia, alternately hosted by Novo Nordisk and AU Science and Technology in the framework of the Aarhus-Novo Nordisk Science and Talent Network. The 2019 symposium will once more serve to identify new and shared scientific areas of interest, stimulate collaborations, and motivate joint project applications. At the symposium, we will also publish a new call for AU-Novo Nordisk joint projects.

On behalf of the AU-Novo Nordisk joint steering committee,

Søren Tullin, Corporate Vice President for Discovery Biology and Technology, Novo Nordisk
&
Søren Keiding, Vice-Dean for research, Science and Technology, Aarhus University
