

# AGRO Researcher Forum

## Introduction to research and project applications

---

Per Kudsk  
Department of Agroecology  
Research Centre Flakkebjerg  
DK-4200 Slagelse, Denmark

# The flag ships have been scrapped and replaced by five focus areas

- Low carbon footprint farming
- Farming with minimum use of chemical pesticides
- Low nutrient emission farming
- Improving and maintaining soil quality
- Sustainable digital-based farming

# Research of the highest international quality

- Research breakthroughs
  - A leading player in the green transition of agriculture nationally and internationally ↔ GRAIN
- Increase international collaboration
  - Increase visibility
  - Take on the role as coordinator of EU projects

# Research of the highest international quality

## ➤ Initiatives

- Enhanced quality and visibility of publications
- Visibility of AGROs research facilities and capacities
- Modernise and upgrade the departments research infrastructure

# Questions for work in breakout rooms

- › Do the five focus areas encompass the key research activities at AGRO?
- › How can research at AGRO benefit from GRAIN?
- › Is AGRO ready to take the lead on international projects? If not what are we missing?
- › How can we enhance quality and visibility of our publications?
- › Other ideas how we can increase the visibility of our research facilities and capacities?
